Welcome to Palais Kitchen

At Palais Kitchens, we design and build kitchens for indoor and outdoor spaces.

Every kitchen is made to fit your layout, your use, your life. We use solid materials like marble and proven European systems. No shortcuts.

We work with a fixed range. You choose the layout and the color. We take care of the rest.

We keep it simple. Clear process. Clean result.

With Palais Kitchens, you're not buying a product — you're building your space, your way. One decision. Long-term value.

About The Designs

Our styles are born in Europe.

Some started in a Paris studio above a bakery. Others took shape in Northern Italy, where carpenters still work by hand.

We select what works. Clean lines, smart use of space, unique Designs .

Each model is tested, refined, and built to last.

You don't need to know the story behind every corner.

But it's there.
